**Subject:** RE: Silver Lake Storage Basin Planned Deviation of Article 402-Start of Month Target Elevation

Good Morning All,

On January 29, 2019, UPPCO received an order from the FERC stating the temporary license amendment for the Dead River System was approved as submitted. With this approval, the requested planned deviation on January 16<sup>th</sup> will not be required (UPPCO is able to follow the updated license parameters). I have attached a copy of the order for your records.

Thank you for your collaboration and support during the process to achieve the temporary license amendment. As we move throughout the year, I look forward to our discussions as well as the potentials for positive impacts to water quality, the ability to release channel forming flows, and reduced impacts to both wildlife and recreation opportunities.

If you have any questions please feel free to reach out.

Regards.

**Josh Ball**
